

We serve Industrial Manufacturers by providing components and turnkey solutions related to assembly, quality, process, safety, material handling and ergonomics.

## Case Study

### Problem

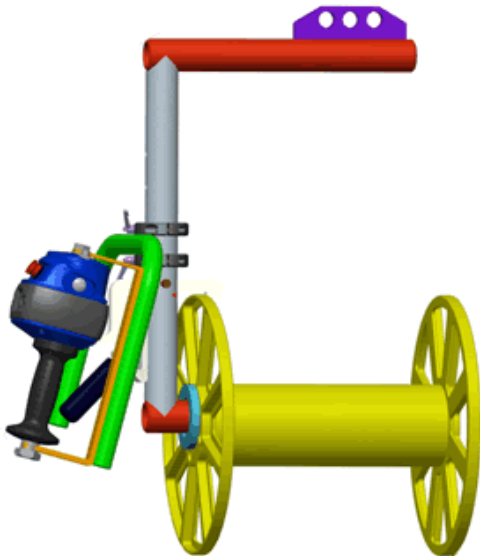

Operators at a major tire manufacturing company were manually handling 50 pound reels of material. Processes were limited to male employees which were at high risk to injury.

### Solution

IMS provided a custom designed lifting system consisting of a Gobel G-Force Intelligent lift and a custom lifting attachment.

### Results

This custom solution allowed operators to lift the 50 pound reels of material at "Zero Gravity". This eliminated the risk of injury to operators and opened the job position to all plant employees.
